ASTA Package

Label Tape is applied to label printer ,which overcomes the work intensity of traditional hand-written label which have the problem of fading in color .

COMPATIBLE WITH

	<p>Brother</p> <ul style="list-style-type: none"> ● TZ tapes ● TZ Special tapes ● RD series ● M tapes ● KD labels 	
<ul style="list-style-type: none"> ● Cartoon Label Tape 		
	<p>EPSON&KING JIM</p> <ul style="list-style-type: none"> ● Standard tapes ● Special tapes ● Pro100 series 	
	<p>DYMO</p> <ul style="list-style-type: none"> ● D1 labels ● D1 Special tapes ● LT tapes ● LW labels 	
	<p>CASIO</p> <ul style="list-style-type: none"> ● EZ-label tapes ● Special EZ-label tapes 	
	<p>MAX</p> <ul style="list-style-type: none"> ● Electronic lettering machine consumables ● Bepop consumables 	
	<p>Canon</p> <ul style="list-style-type: none"> ● Tube marking printer consumables ● Plate printer consumables

Features:

Withstands
Chemicals

Withstands
Water

Chemicals and Water Resistance

Immersed ASTA laminated tapes in various liquids for 24hours, like water, alcohol, isopropyl alcohol, machine oil and other chemicals. The tapes still adhere to their surfaces firmly with no damage.

Withstands
Abrasion

Abrasion Resistance

ASTA laminated tapes just show slightly scratched in the tape but no affect with the characters print underneath the tape after the abrasion resistance test, with 50 round trip passes with a 1kg weighted sand eraser.

Laminated
Tapes

Laminated Tapes

ASTA laminated tapes are able to adhere almost any surface, including: glass, stainless steel, PVC, phenolic resin, acrylic, polypropylene and polyester-coated wood. Even the rough and irregular surface. ASTA laminated tape also have good performance in hot, cold and humid conditions, and even adhere better when heated.

Strong
Adhesion

Adhesive Strength

ASTA laminated tapes are able to adhere almost any surface, including: glass, stainless steel, PVC, phenolic resin, acrylic, polypropylene and polyester-coated wood. Even the rough and irregular surfaces. ASTA laminated tapes also have good performance in hot, cold and humid conditions, and even adhere better when heated.

Withstands
Temperatures

Withstands Temperatures

Attach ASTA laminated tapes to the surface of sandpaper rubbed stainless steel and test the temperature resistance. Tape have no change after 2 hours storage at -30°C place. White Tape have slightly color fading. But the adhesion softened and strengthened by heating.

Withstands
Fading

Withstands Fading

Attach ASTA laminated tapes to metal coating surface and put into a fade induced laboratory at 83°C to hours, and stimulated a year in the weather indoor. Then they were placed in a laboratory at 63°C for 400hours to simulate a year in, not only heat and light but water as well. Only yellow tapes showed significant signs of fading while the others showed little sign of fading to the eyes.

Easy Peel

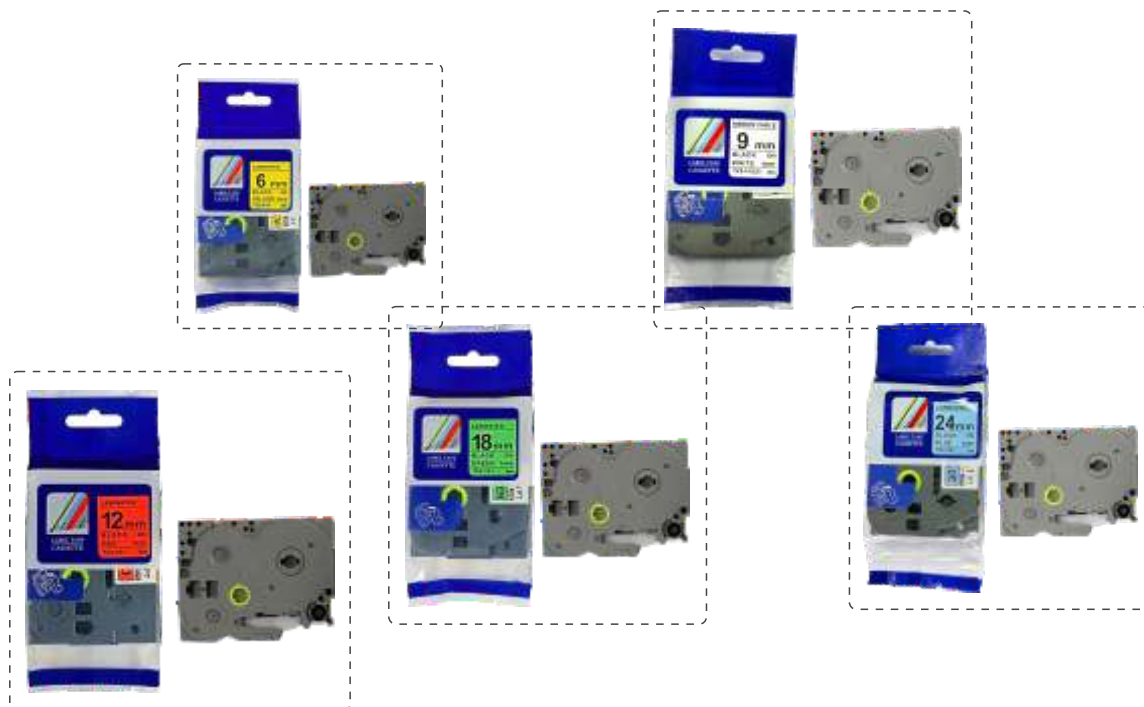

Easy Peel

The adhesion of ASTA laminated tapes use special pressure sensitive adhesive design, which has the strong adhesion to adhere any surface, and no gum left after peel.

Dielectric Strength

Use ASTA black on white tapes to test the dielectric test. they began to lose their electric resistance at an applied voltage of 8kv, and lost their resistance entirely at 11kv. Most other color variations will have the same resistance.

FOR BROTHER-TZ SERIES
